Maitre'D®
2005 Setup Guidelines

Item Classes

Item Classes

[Click to continue](#)

Item Classes allow to group sales items on buttons in preferential screens quickly and easily.

After defining an item class on a button on a screen, linking a sales item to that Item Class automatically adds that sales item in that button.

You can also include an Item Class within a variable list. Because a variable list can contain many Item Classes, that in turn can contain many sales items, you are not limited to 100 sales items per list.

Item Classes

Setup:

- 1) Item Class
- 2) Sales Item

This document will walk you through these setups step by step.

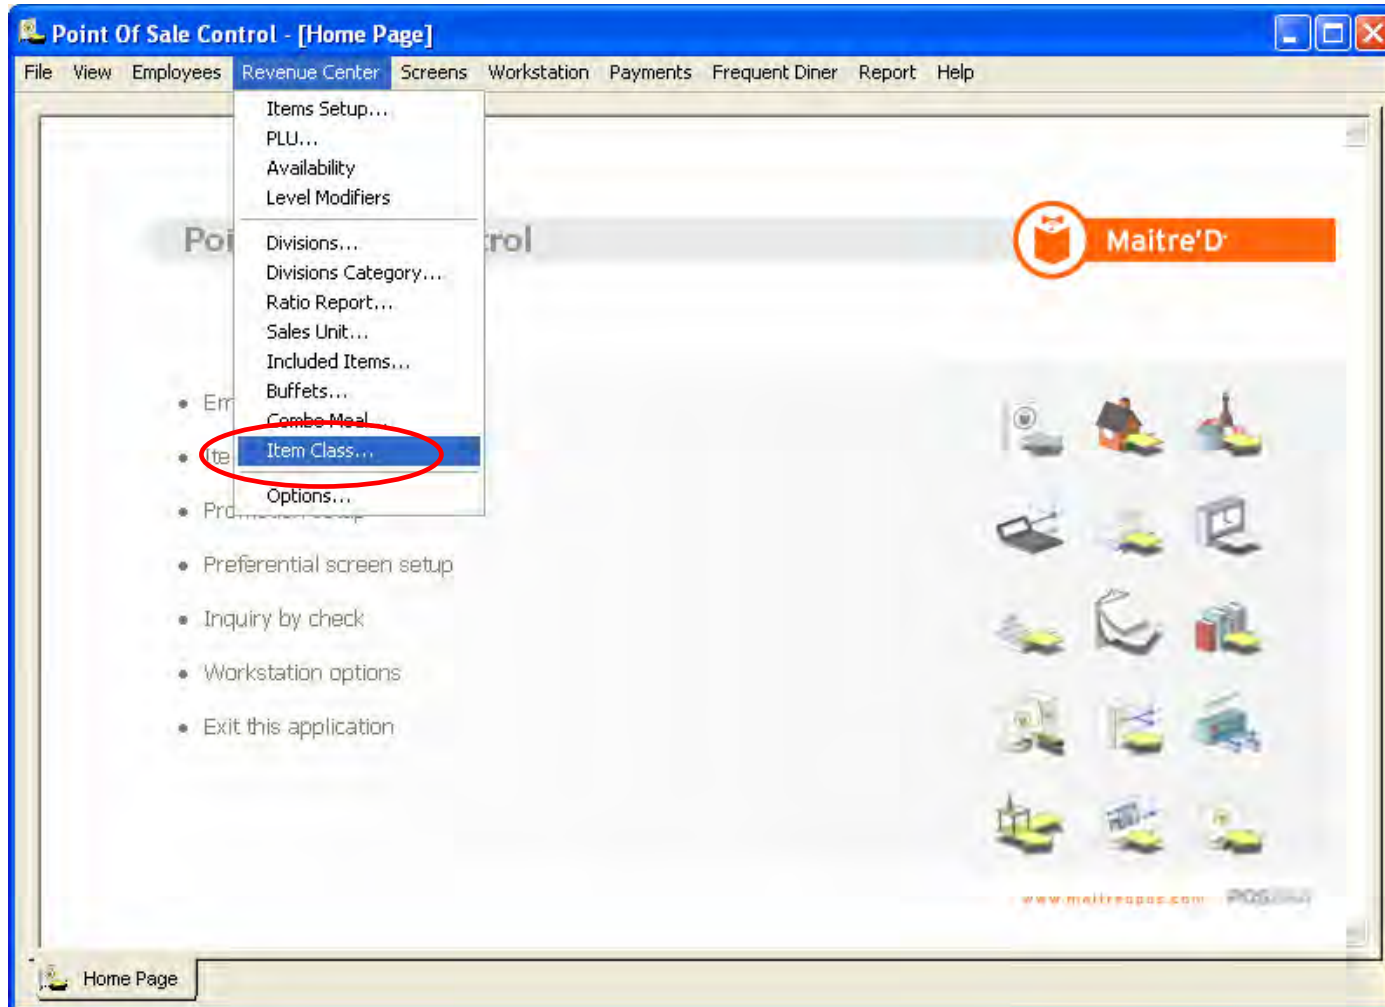

Step 1: Item Class

Step 1: Item Classes

Click to continue

In the P.O.S. Control module, click on Revenue Center, then click on Item Class.

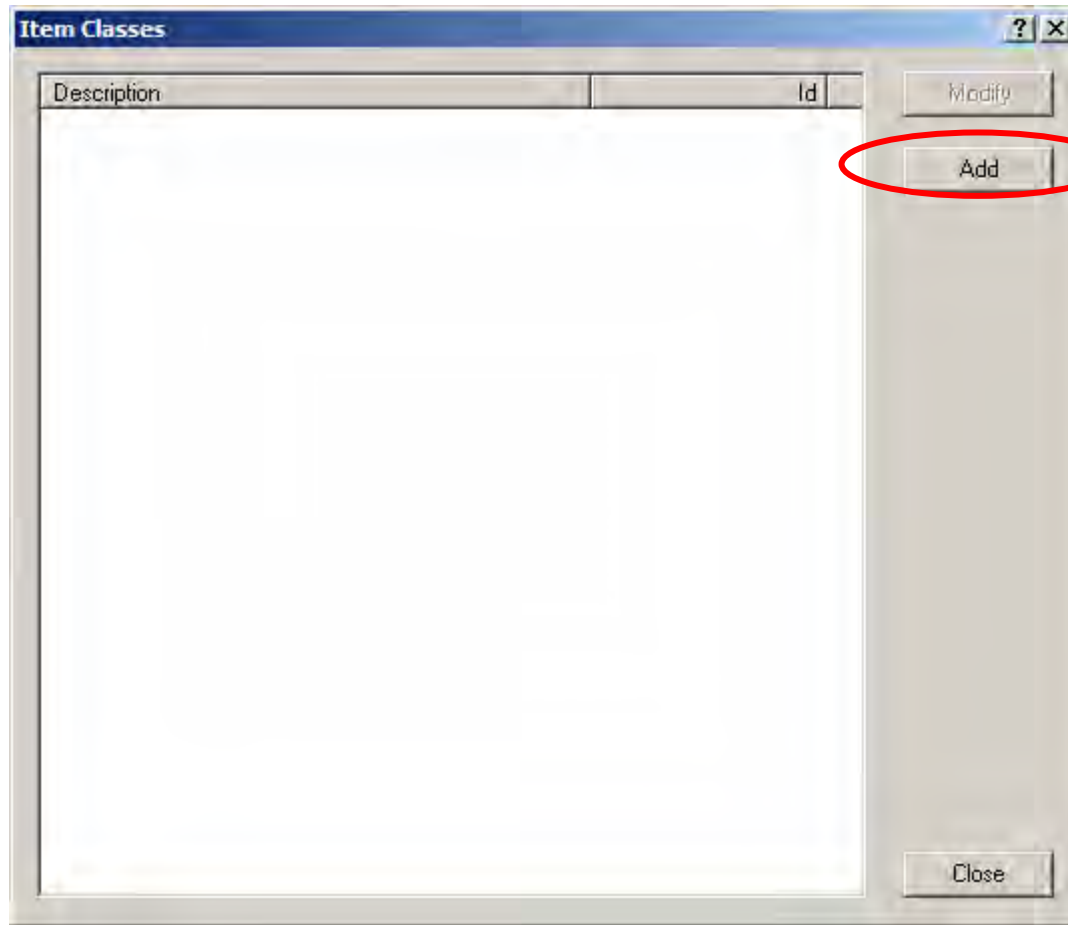

Step 1: Item Classes

Click to continue

Click on ADD.

Step 1: Item Classes

[Click to continue](#)

Enter a **Description** for this group of items.

Click on OK.

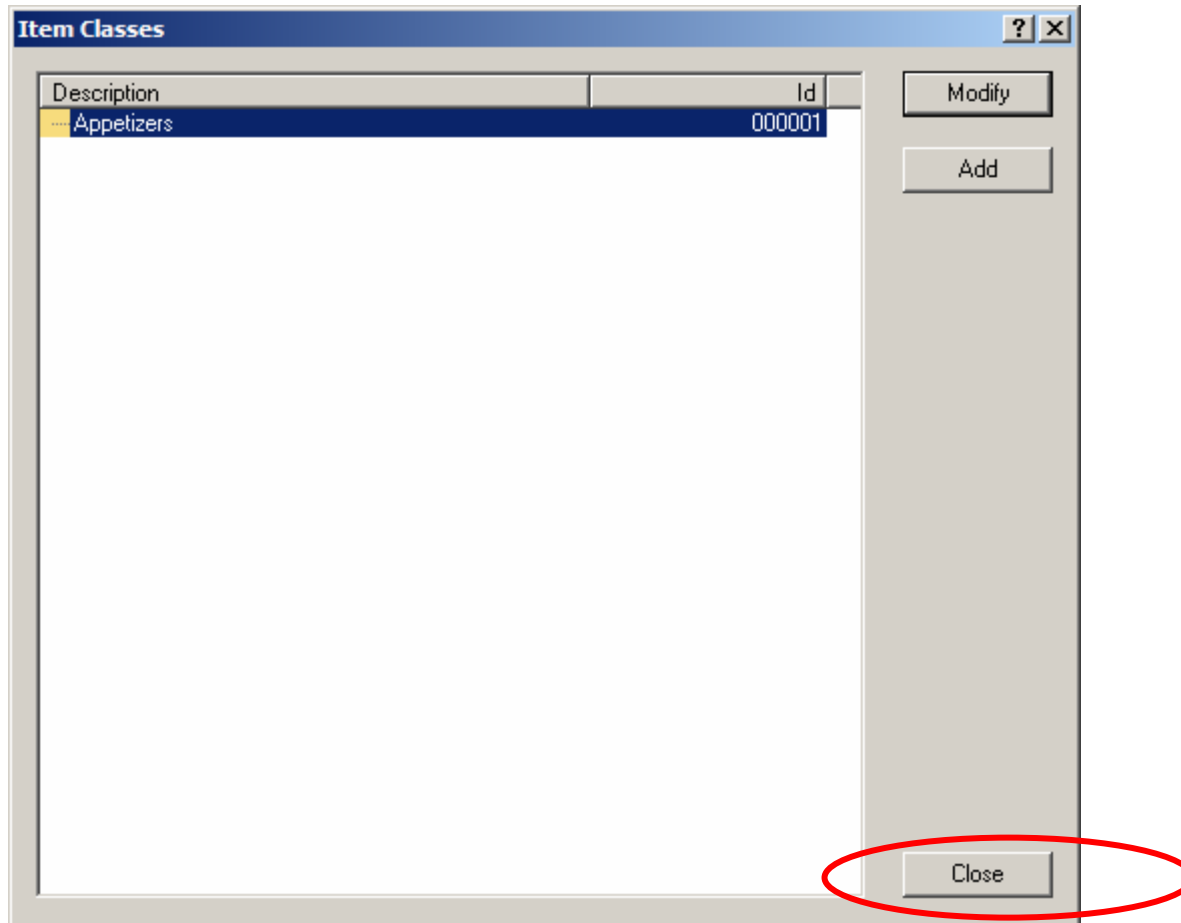

The screenshot shows a dialog box titled "Item Class - Record #1". Inside the dialog, there is a text input field labeled "Description" containing the text "APPETIZERS". A red oval is drawn around the "Description" label and the input field. At the bottom of the dialog, there are three buttons: "OK", "Delete", and "Cancel".

Step 1: Item Classes

Click to continue

Click on CLOSE.

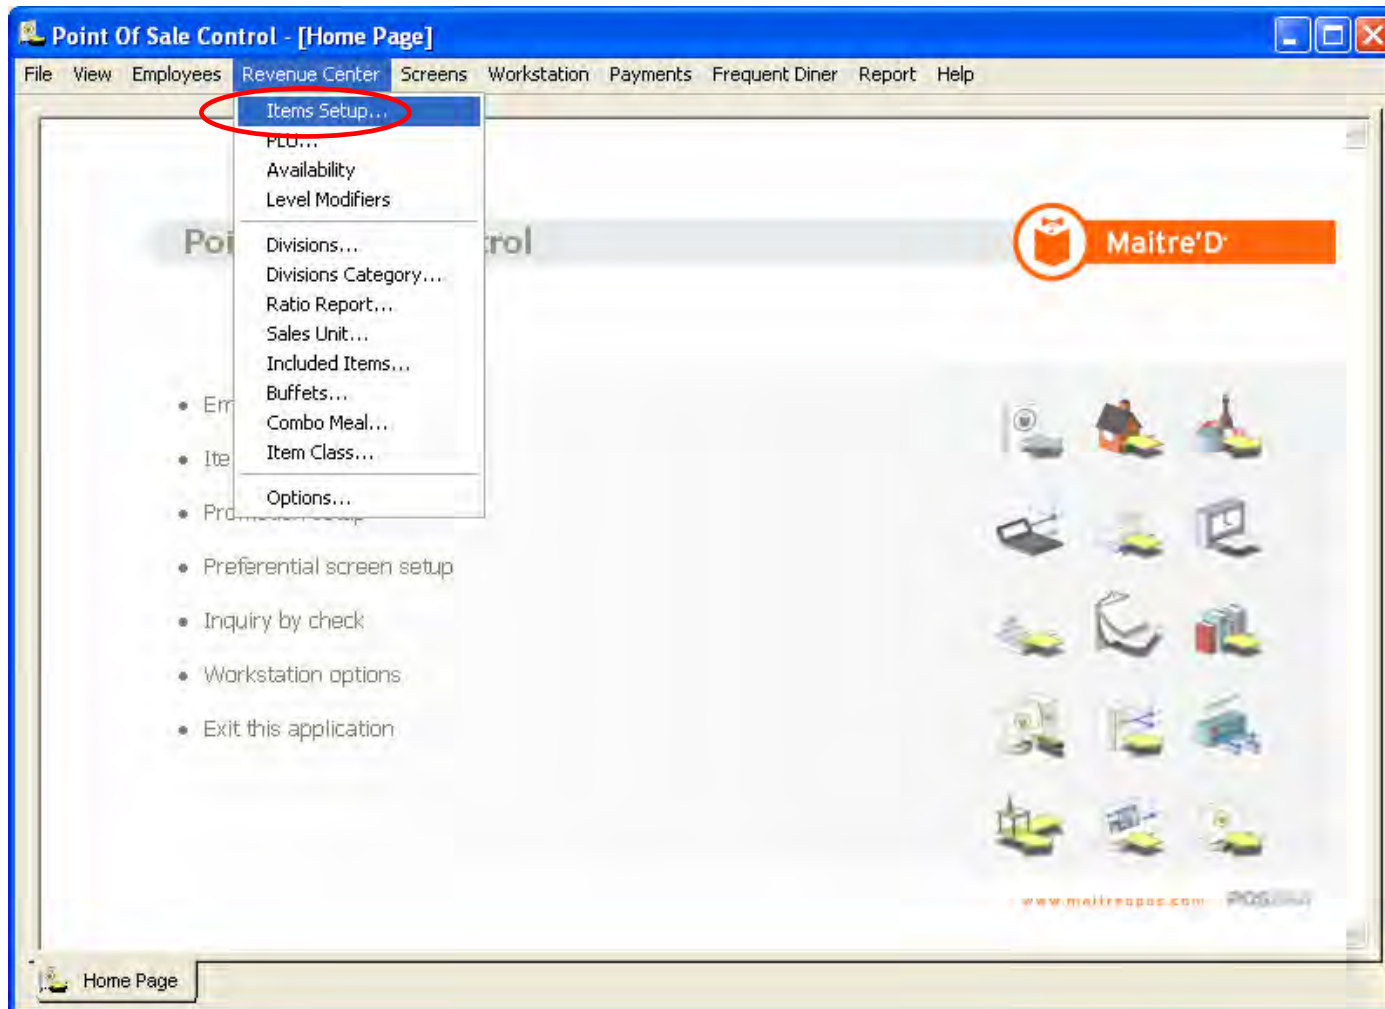

Step 2: Sales Item

Step 2: Sales Item

Click to continue

Click on Revenue Center, then click on Items Setup.

Step 2: Sales Item

Click to continue

Select a **Sales Items** to include in that Item Class.
Click on **MODIFY**.

The screenshot shows the 'Sales Items' window with the following data:

Item	PLU	Division	Function	Id
DAILY SOUP		APPETIZERS	Revenue	008305
GARLIC SNAILS		APPETIZERS	Revenue	008307

The 'Modify' button is circled in red.

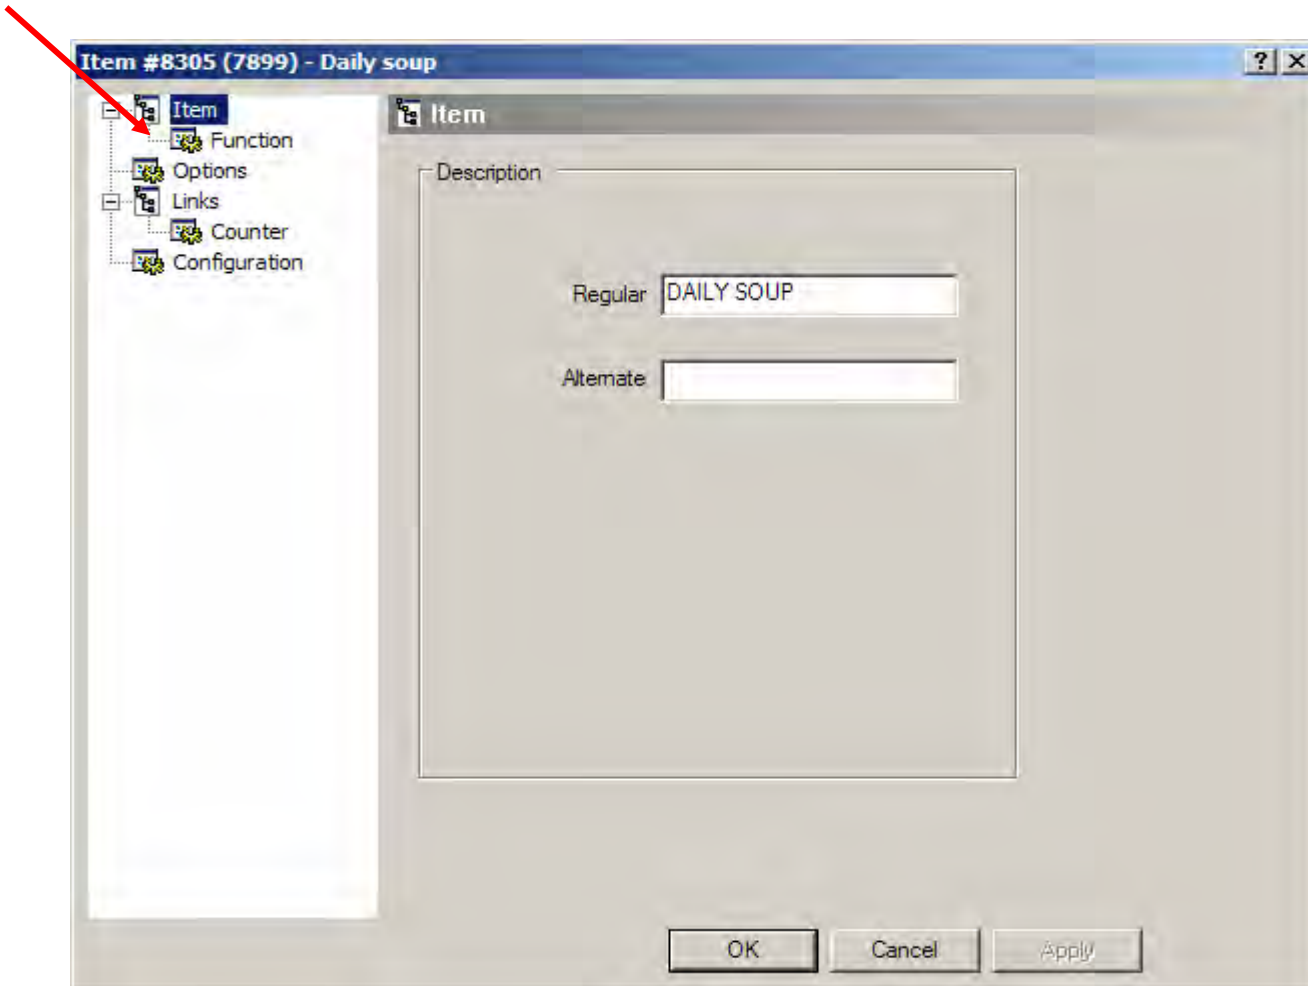

Step 2: Sales Item

[Click to continue](#)

Other Sales Item's options are explained in the Items Setup presentation.

Click on Function.

Step 2: Sales Item

Click to continue

Select the **Item Class** from the dropdown list.

Click on OK.

Item #8305 (7899) - Daily soup

Function

Function: Revenue

Division: Appetizers

CVM Color: Use default

Item Class: Appetizers

Main Combo Item

Open Description

Open Price

OK Cancel Apply

Step 2: Sales Item

Click to continue

Repeat this for all sales items to include in this Item Class.

Click on CLOSE.

This concludes the “Item Class” presentation.

We hope that this document helped you to understand the steps needed to setup Item Classes in Maitre'D.

Refer to the “Variable Lists” presentation for explanation on including Item Classes in variable lists.
